

MAXILLARY ONE STAGE ANTRAL AND NASAL LIFT PROCEDURES COMBINED WITH COMPOSITE INLAY BONE GRAFTS AND ENDOSSEOUS IMPLANTS FOR RECONSTRUCTION OF THE COMPROMISED EDENTULOUS MAXILLARY RIDGES

.EGYPTIAN DENTAL JOURNAL, 44 :3155-3160 , 1998 .

عمليات رفع قاع الجيب الأنفى والمنخار فى عملية واحدة مع ترقيع عظمى وغرسات أسنان معدنية لترقيع الفك العلوى المتآكل جدا .

ABSTRACT :

Numerous bone grafting techniques with and without immediate implant placement have been advocated .A maxillary one stage antral and nasal lift techniques combined with free autogenous corticocancellous iliac bone grafts secured by endosseous titanium implants were performed to nine patients suffering from compromised maxilla , with great survival and success rates .
