## Research Details :

Research Title : Potentially serious Lamotrigine-related skin rash  
Potentially serious Lamotrigine-related skin rash

Descriptipn : Objective: To report our experience with lamotrigine (LTG)-related skin rash in children with epilepsy. Methods: We identified a series of consecutive children with epilepsy treated with LTG prospectively over a 5- year period ending 1st October 2005 at King Abdul-Aziz University Hospital and King Faisal Specialist Hospital and Research Center, Jeddah, Kingdom of Saudi Arabia

Research Type : Article

Added Date : Saturday, May 17, 2008
